

Nuno Moura

Product Designer @ Mammoth Analytics

ABOUT ME

I'm ambitious and a curious person, always seeking alternatives and a more efficient way to maximize productivity for the end-user and company. Learning for Design Systems and User Interface, and with a strong interest in Frontend.

EXPERIENCE

Product Designer Sep 2020 - present
Mammoth Analytics (UK)

Working remotely, I'm focused on developing new features and improving platform usability. I am responsible for the Mammoth design system, liaising with developers to ensure a high-quality product both from a technical and design perspective. Currently, I am also engaged in improving the overall design process and organization, including handoff and documentation practices.

Communication Designer May 2019 - Aug 2019
Get Mood (PT)

While working with "Get Mood" as the only designer, I was responsible for the whole process of developing new visuals for two craft beer festivals, successfully launched and implemented. I worked with visual identity, image composition and editing, corporate material, final-arts, editorial design, and designs for festival stands.

Communication Designer Dec 2018 - Mar 2019
Information Planet (PT)

Having been hired as a short-term designer to strengthen the team, my goal was to design and develop the brand identity for an annual festival. I worked on the brand identity, merchandising and corporate material, and editorial—all completed within the estimated timeframe.

 April 3, 1995
